ADVANTAGES OF PAINT PROTECTION FILM

BONNET
Hate those annoying stone chips on your bonnet? The front end of the car exposed to the most amount of damage. Protect your bonnet from stone chips and other such damage, with either full or partial coverage.

A-PILLAR + FRONT ROOF LINE
This area can become surprisingly damaged due to stones flicking up from the road as well as tree branches and road debris. Adding a strip of Paint Protection Film helps to shield your car from the elements.

FRONT BUMPER BARS
Reduce the damage of bumper bars (and wheel arches) with paint protection film. The invisible film provides a layer of protection from scrapes and scratches. Protecting the paintwork.

DOOR HANDLE CUPS
Ever noticed how damaged the door handles and cups get from constant use? Scratches and scrapes are unsightly and are inevitable to this area of the car. The almost invisible protection of paint protection film is the solution.

SIDE MIRROR CASINGS
Side mirrors can come up against all sorts of damage. From stones to tree branches. Paint Protection Film flexible and moulds to the shape of the mirror casings to help keep your paintwork free from chips and scratches.

DOOR EDGES
Reduce wear and tear on the edge of your vehicle's doors. Edge protection is an excellent option to help shield against potential chipped paint and scrapes that often occur in parking lots.

DOOR SILLS
Child proof your car with paint protection film applied to the door sills. This area of the car can become damaged quite easily, but with a layer of almost invisible protection will help prevent your paint work from all sorts of damage.

REAR BUMPER BARS
Getting your shopping luggage, golf clubs or the kids sports gear in and out of the boot is sure to cause some scratches and scrapes to your rear bumper panels. A strip of paint protection film provides a durable protective layer.

SUPERIOR PROTECTION

SELF HEALING

HEAT RESISTANCE

EASY TO REPAIR

PRESERVES RESALE VALUE

DON'T WORRY, THE FILM ISN'T RED!
Red panels above indicate the areas typically protected and is for demonstration purposes only. The paint protection film is optically clear.
